

Covid-19 Vaccine Availability Alert System

There is a new service called Vax that could help you find a vaccine appointment.

Text VAX to (912) 361-6763.

When Vax detects **potential** vaccine appointments at pharmacies up to 50 miles away, it will send you a direct link to the pharmacy scheduling website.

It may take you a few tries to successfully schedule an appointment, but people are successfully getting appointments using Vax.

[Please confirm that you are eligible](#) before using Vax. Vax is not a replacement for the healthcare system. You should still pre-register with [New Jersey](#) and [Hunterdon County](#).

Vax is free, though your regular text message fees may apply.

Vax was created as a public service by Stockton resident Dmitry Mazin and Long Island City resident Phil Shao. If you have any questions, please reach out to Dmitry at dmitry@hellovax.org.
